### Summary

My passion for coding and my undaunted spirit sprouts my dream to create a better world through technology. Currently, a student pursuing a bachelor's degree in AI. In tandem with my studies, my interest in blockchain technology and web3 has sparked my curiosity and motivated me to self-learn. Aiming to implement my blockchain and AI knowledge in healthcare field and help revolutionize the efficiency of healthcare diagnosis and treatment in Malaysia.

### Skills

### Experience

#### Outlier

##### Prompt Engineer

- Verified Chinese responses and gave a rating on the responses.
- Help improve the response given by the AI.
- Have an 80% rating score based on the feedback by the developers.
- Rose to “Gold Rating” in terms of the quality of work.

#### Revolution

##### Smart Contract Auditor

- Audited contracts on a new token

#### Talentcloud.ai

##### Software Tester & Project Manager

- Successfully onboarded multiple prominent companies in Malaysia onto our system
- Wrote documents on how to use Postman for data importing.
- Black box and white box tested a new KPI feature.

#### Sales Connection

##### Software Tester & Business Development

- Standardised user manual procedures
- Helped host a government initiative to bring companies to use CRM in their business.
- Help onboard few MNC companies such as Dover.

### Projects

#### Lower Back Pain Detection

<https://github.com/JiaYong02/Lower-Back-Pain-Predicton>

- Utilise different AI models to classify lower back pain.
- Involved in data cleaning and visualization.

- Used neural network for lower back pain detection.

#### Hotel Review Sentiment Analysis

<https://github.com/codyy6/Text-Analytic-Hotel-Review-Sentiment-Analysis>

- Used NLP for detecting the sentiment of the reviews.
- Cleaned and standardized the dataset before classification was done.
- Used Support Vector Classifier (SVC) for the sentiment analysis.

#### Glove Defect Detection

<https://github.com/EHeng17/glove-defect-detection>

- Utilised Python as the programming language for image processing
- Used different methods such as K-means or height detection to analyze different defects

#### APUBCC Website

<https://apubcc.org/>

- Responsible for designing the “About” page.
- Utilised different open-source templates to design the “About” page.

#### Encode Hackathon Storage System

<https://github.com/codyy6/Encode-Hackathon-Website>

- Responsible for frontend and backend integration (API calling)
- Using a crypto wallet address to have its file storage system.

#### BlockChess

<https://github.com/Jeanqianying/ETHKL>

- Built the chess board for demonstration purposes.
- Built the basic smart contract code for transferring crypto and betting on crypto.
- Integrated the ABI into the website using the React framework.

#### Education

Asia Pacific University of Technology and Innovation (APU)	3.78 CGPA
Diploma in Data Informatics	2020 - 2022

Asia Pacific University of Technology and Innovation (APU)	3.52 CGPA
Bachelor’s degree in computer science Specialised in Artificial Intelligence	2022 – 2024

#### Extra-Curricular

<b>APU Blockchain and Cryptocurrency Club (APUBCC)</b>	
Research & Development Committee	2022 - 2023
Bootcamp Leader	2023 – 2024

<b>Artificial Intelligence Club (AIC)</b>	
Research & Development Committee	2023 – 2024
